**Subject:** Council Meeting Testimony

I believe that our over-reliance of oil is largely connected to our huge plastic bag consumption because there is a significant amount of pollution caused by the production of plastic bags and oil is used to produce them as well. This is a huge step toward reducing our pollution and over-reliance of oil, so because of these reasons I support Bill 10 in all of the good it will do our county and State in the long run. We need to keep our Islands clean for tourism to be an effective source of economy, and eliminating the hazardous effects of plastic bags on pollution as well as marine life will help us significantly.
